RESPONSE TO RESTRICTION REQUIREMENT

Sir:

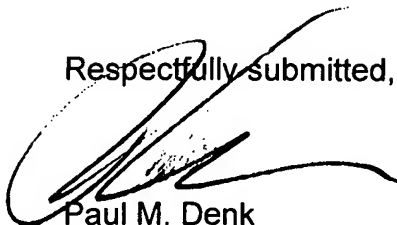

This is in response to the Examiner's restriction requirement dated  
October 4, 2006.

The Examiner's request to restriction with regard to claims 1 - 12 of this  
application.

Actually, unlike the species restrictions as identified by the Examiner, the  
concept of the intraocular implant lens of concern to the Applicant is shown in  
FIGS. 21 - 25. This particular species for the implant is also what is described in  
claims 1 - 12 of this application. Hence, while the drawings may show many of  
the earlier embodiments of the Applicants' invention, and which has already been  
described in the background of this invention, this is the specific type of lens that  
is of interest to the Applicant, and its fabrication. And, these are shown in the  
identified figures, and explained in the claims.

Thus, it is these claims, and these figure embodiments, that the Applicant wishes to process in this application.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Paul M. Denk', is written over the typed name.
